MedEdConnect™: Streamlining and improving the verification process

Medical school credentials play an important role in a physician's career, impacting everything from state licensure to hospital privileges. With MedEdConnect™, we've streamlined and improved the verification process, making it easier for medical school staff to update physician information.

MedEdConnect™ is a secure online portal where you can upload diplomas, transcripts and other documents to individual physician profiles. Each document receives an electronic seal verifying its authenticity—eliminating the need for email, mail or faxed copies. Multiple users from each institution can access the system.

Save valuable staff time and resources using MedEdConnect™

Simple Setup

User accounts are created and managed by FSMB staff and provided to organization-approved users.

Secure Network

Online verification uses SSL to encrypt communications between the client browser and the web server.

Eliminates Oversights

Users are immediately notified of missing information, reducing returns to the medical school.

Efficient Time Management

Expenses and staff time are reduced compared to traditional verification methods.

Lifetime Repository

Medical school staff maintain access to all completed document requests.
