

## Comprehensive license and discipline data for physicians and physician assistants

The Federation of State Medical Boards offers a variety of data services for organizations seeking comprehensive, up-to-date licensure and disciplinary information on physicians and physician assistants (PA). Our Physician Data Center (PDC) contains records for nearly 1.2 million physicians (MD & DO) and PA's licensed in the United States, including foreign medical graduates.

Data files include biographical data, medical school, licensure history and disciplinary actions taken by regulatory agencies. Additional data points such as a physician's NPI and DEA numbers make it easy to integrate with other databases.

### A TRUSTED SOURCE

PDC's long-standing partnerships with state boards ensure that you receive continuous updates when physicians and PA's are licensed or disciplined.

- Licensure updates received monthly from state boards in the United States and its territories
- More than 80 million records processed annually
- Nearly 10,000 disciplinary sanctions added annually

**Simplify your data collection with access to data for more than 1.2 million actively licensed physician and PA's.**

# SOLUTIONS TO MEET YOUR NEEDS

The FSMB's industry-best data integration program offers data products that are unparalleled in their quality and completeness. We offer three distinct solutions with access to data files through a secure server. Our data meets the highest standards, and the Physician Data Center is NCQA certified.
